**Mains water supply cannot be guaranteed during a bushfire**

Water Corporation is prepared for bushfire season. However, we cannot guarantee that water pressure or water supply will be maintained in the event of a bushfire. Extreme demand, fire damage and power cuts can all result in a total loss of water.

If you plan to stay and defend your property during a bushfire, you must have your own independent water supply and pumping capability. You cannot rely on mains water.

### Emergency Preparedness Starts at Home

Last Wednesday a group of us travelled to Cranbrook to attend the Emergency Procedures meeting, being hosted by the Shire of Cranbrook.

The meeting featured speakers from DFES, Red Cross, Police, Department of Communities, and Ranger Joe discussing bushfire preparedness and recovery.

I personally found it insightful and walked away with a better understanding of each organisation and the part they play in Bushfire management.

It's good to know that these valuable resources are at our fingertips.

There were some amazing Door prizes, which two of our group got to take home.

Overall, a great night!

### Departing Councilors

The Ordinary Meeting of Council held on Wednesday, 18 October 2023 marked the end of the era as two of our Councilors headed into retirement. Cr Phil Horrocks and Cr Peter Beech both decided to hang up their Councilor boots ahead of the 2023 Local Government Elections that took place on Saturday, 21 October.

Cr Phil Horrocks began as Councilor in 2015 and then moved into the role of Shire President in 2019. Cr Peter Beech was elected in 2011.

Unfortunately, with the decrease in the number of Councilors Cr Jen Quick was not able to be re-elected, and we would like to take this opportunity to thank her for the last four years of service to the community. She will be very much missed.

Young children can drown in portable pools in a matter of seconds if left unsupervised. Any pool that is designed for swimming, wading and paddling that contains water more than 30cm deep, must be enclosed by an effective safety barrier that complies with the laws.

## Political Correctness – Is It a Strain on Our Wellbeing?

Political correctness is a doctrine which holds forth the proposition that it is entirely possible to pick up a bit of shit by the clean end. In my opinion, political correctness is a major inhibiting factor when interpreting bureaucracy and applying common sense (often the ingredient missing out of lots of decision making) in our daily life. This ultimately can affect our wellbeing.

Bureaucracy on its own does have its place, however at times it can limit how we do things because of the many layers of rigid rules that can complicate getting the job done on the ground. This occurs in everyday life whether completing tedious processes, filling out pages of paperwork, or dealing with a system that appears to be more focused on processes rather than helping achieve an outcome.

When a disaster strikes (i.e. catastrophic fires, floods and droughts) or personal health and safety issues arise in our life, layers of bureaucracy are not always helpful, they can exacerbate an already tense environment. We have spoken to many blokes who feel both frustrated and restricted in their reactions to these disasters because of the many layers of procedures that had to be adhered to. Common sense was taking second place!

The point about the effects of this political correctness doctrine, is that it enshrines both bureaucracy and common sense and quite often masks/dilutes what should be done and said and can also inhibit robust discussions.

Blokes, by our own nature are hard wired to be action orientated i.e. we want to solve problems, and we want to do stuff now. Once this is stifled by political correctness, a few things can start to happen:

- normal stress can become distress;
- short cuts can be taken (with increased risk);
- our natural problem-solving process is inhibited;
- blokes shut down and stop seeking help (we go into our cave and don't come out);
- It creates an *us versus them* mentality.

So where have we gone wrong and how can we make changes?

- Don't allow political correctness to mask what should be done and said. Sometimes we must be critical and blunt about our processes to keep them relevant and up to date;
- Bureaucracy should facilitate what we do, not dictate how we do it (not create barriers and thus

frustrate people who are trying to deal with a challenging situation at the coal face);

- The common sense rule should be applied to everything we do. I repeat, apply it to everything we do;
- People/communities have the innate ability to band together and deal with stressful situations. This should be fostered thus empowering individuals and communities rather than disempowering through micro-management and removing them from vital decisions regarding their own lives and local community;
- Language is always important. Appropriate language that can be understood needs to be used. A robust discussion is vital to air all points of view and to prevent mistakes being repeated.

Remember at the end of the day we are responsible for our own wellbeing. Hopefully these suggestions, encourages communities to claim back some responsibility and ownership. This would bring about positive change not only in blokes lives but the whole of the community.
